510TK Model

10.0 Litre Tank

Product # 02 000512.0TAD

Product Description

These machines are specially designed to inject Anti- Damp liquids to a designated area by professional operators. The injector tanks are made from heavy gauge stainless steel by GLORIA -Germany. The injectors are equipped with 2.5 m industrial grade hose , Ø 9.0 mm heavy duty brass injector in 3 different length (250, 350, & 450 mm) and also a brass trigger valve to control the liquid output. These machine can be pressurised by either a manual heavy duty inbuilt pump or compressed air.

Applications

For injecting anti-damp liquid/paste.

Technical Features

- ▶ VITON Seals
